

While your allocation of sessions should be what's required for day-to-day trading, sometimes you may find that specific days require a different configuration. For example, very busy restaurant days such as Valentine's Day, Mother's Day or Christmas may well mean you need to alter the way you trade on those days. If those changes require different sittings, you'll need to [create a session](#) to reflect this (or use an existing session that normally applies on a different day of the week). You can also create a different table plan specifically for such a session – for more on this see [here](#). PLEASE NOTE – you need to make sure that the slot period of any special session is compatible with the session normally in place on the day(s) that you plan to apply it. This is so that any bookings made prior to the override session being configured will still display on the diary alongside the new session's bookings.

With the new session created, to allocate it to a specific date or date range click 'Add' on the Session Overrides tab. You'll see a screen like this;

Session ×

Session:   
Breakfast  
Lunch  
Sundays  
Valentines  
Dinner  
Dinner w/e

Start Date:

End Date:

Applicable Days

Monday  
 Tuesday  
 Wednesday  
 Thursday  
 Friday  
 Saturday  
 Sunday

Select All

Select the session(s) you wish to use, the start and end date and, if applicable, which days of the week between those two dates the override should apply on. In the example below we've chosen 11<sup>th</sup> to 14<sup>th</sup> February 2023, but we'll only apply the Valentines session on the Saturday and Tuesday;

Session ×

Session:

Start Date:

End Date:

Applicable Days

Monday  
 Tuesday  
 Wednesday  
 Thursday  
 Friday  
 Saturday  
 Sunday  
 Select All

Click OK and you'll see the selected date(s) and session(s) in the summary list;
